

Guided Pathways

**FIRST YEAR EXPERIENCE (FYE) PROGRAMS
WORKGROUP**

NICK HILL, DR. ROAM ROMAGNOLI, RIVA BRUENN,
BYRON REAVES

CHARGE

Identify and collect all existing FYE, bridge, orientation programs and activities; cohere existing programs and activities into a simple, accessible FYE webpage (and/or app, cubby link, Canvas Page) with links to resources

PRODUCT

We created an exhaustive list broken down into categories that will be easily accessible to students.

We also change the website language into student centered language that can be easy navigated

ON GOING CONVERSATIONS

- Front Door: We are still in discussion on where this information will live (website, canvas, cubby, etc.) We want to interview students and faculty/staff to understand where students will access this information
- We are continuing our work to make this a live page despite where it lives.
- Students enter our college at different points, calling in a first year experience page might deter students from using the links.

NEXT STEPS

- Work with website design to provide cohesive way to access this list of resources
- Work with academic backpack to link our first year specific resources into a broader system
- Work with FYE course design to get their specific course information into our list
- Identify gaps, write recommendations
 - How do the courses fit into the overall experience we want for our first time college students?
 - Recruitment/outreach - outreach to non traditional students (who ARE traditional at a community college) outside 18-22 age group, have taken some or no college courses. Not just to high school students.
 - Find examples to use for inspiration
